Morning Activities/Reporting:

- March Wednesday Walk; Annual General Meeting, New Information Panel, Rubbish clean-up

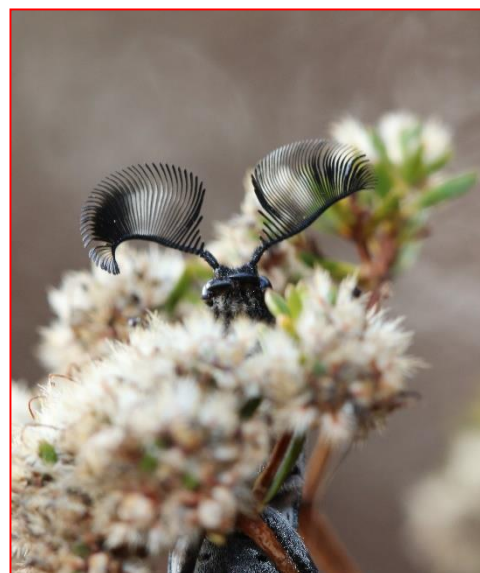

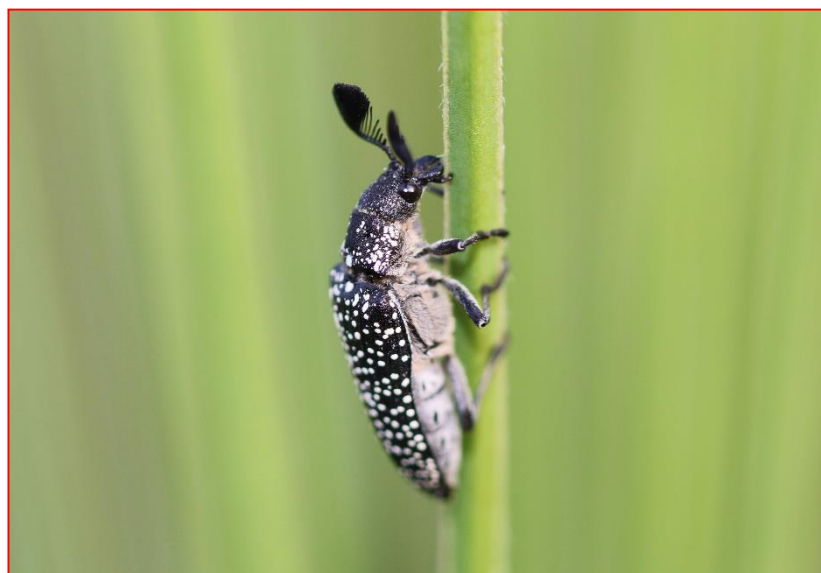

Glimpses of the Month!

April 21st Full Moon and the New Information Panel!

One of the many feather horned beetles that I spotted around north-eastern side of the main wetland. The one below shows the marvellous comb like feather horn.

An eagle hovering on top scared this family of four magpies resting on a paper bark tree!

Common Grass Blue is still hanging around-I have mostly observed this butterfly in spring and summer.
